REQUEST FOR SECOND CERTIFICATE OF CORRECTION TO CORRECT THE
FIRST CERTIFICATE OF CORRECTION BASED ON PATENT OFFICE
MISTAKE PURSUANT TO 35 U.S.C. §254

EJ

APPLICANT(S): Heinrich Jürgensen CONFIRMATION NO.: 5122
SERIAL NO.: 09/786,742 GROUP ART UNIT: 2828
FILED: September 14, 2001 EXAMINER: James A. Menefee
PATENT NO.: 6,888,853 ISSUED: May 3, 2005
TITLE: "LASER RADIATION SOURCE"

ATTN: Certificate of Correction Branch
Commissioner of Patents
P. O. Box 1450
Alexandria, VA 22313-1450

*Certificate
JAN 06 2006
of Correction*

SIR:

Pursuant to 35 U.S.C. §254 and MPEP 1480, a Second Certificate of Correction is requested to correct Patent Office errors in the first Certificate of Correction.

In the first Certificate of Correction dated November 15, 2005 (Exhibit 1 attached), the Patent Office made errors in the drawing corrections.

In the first Request for Certificate of Correction filed May 18, 2005 in the tendered Certificate of Correction Document from Applicant, Applicant requested the following correction to the drawing figures:

"For drawing figures 1, 4, 4b, 4c, 8, 29, 32, 33, 35, 36, 37 and 41, legends are added as shown on the attached drawing sheets. In the drawing sheets 1 through 39, replace drawing sheets 1, 3, 5, 6, 11, 24, 25, 26, 28, 29, 31, and 34 with the attached same numbered drawing sheets. This corrects errors in the legends."

In the first Certificate of Correction issued by the Patent Office on November 15, 2005, these instructions were not followed.

JAN 09 2006

For convenience, Applicant again encloses replacement drawing sheets 1, 3, 5, 6, 11, 24, 25, 26, 28, 29, 31, and 34 which should be attached to a Second Certificate of Correction being requested herewith to correct the drawing errors in Figures 1, 4, 4b, 4c, 8, 29, 32, 33, 35, 36, 37 and 41.

The original Request for Certificate of Correction filed May 18, 2005 explains the original drawing errors made by the U.S. Patent Office necessitating the request for the first Certificate of Correction.

Attached is the requested Second Certificate of Correction.

JAN 09 2006

UNITED STATES PATENT AND TRADEMARK OFFICE
SECOND CERTIFICATE OF CORRECTION

PATENT NO. : **6,888,853 B1**

DATED : **May 3, 2005**

INVENTOR(S) : **Heinrich Jürgensen**

It is certified that errors appear in the first Certificate of Correction dated November 15, 2005 for the above-identified patent, and that said First Certificate of Correction for said Letters Patent is hereby corrected as shown below:

In the first Certificate of Correction dated November 15, 2005 after the "Drawings," the following should be stated:

Replace drawing figures 1, 4, 4b, 4c, 8, 29, 32, 33, 35, 36, 37 and 41 with the attached drawing figures 1, 4, 4b, 4c, 8, 29, 32, 33, 35, 36, 37 and 41 as shown on the attached pages.

MAILING ADDRESS OF SENDER:

Schiff Hardin LLP- Brett A. Valiquet
 6600 Sears Tower – Patent Department
 Chicago, IL 60606

PATENT NO. **6,888,853 B1**

No. of additional copies

This collection of information is required by 37 CFR 1.322, 1.323, and 1.324. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1.0 hour to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Attention Certificate of Corrections Branch, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

(37) ABSTRACT

A system and method for selectively process material on a processing surface of a printing form to create a fine structure or pattern for images or text. At least one fiber laser comprising a pump source and a laser fiber is provided. A laser gun is mounted adjacent the printing form and has at least a focusing optics. The fiber laser outputs a laser beam which is diffraction-limited to permit the focusing optics to focus the laser beam onto the processing surface of the printing form as a spot having a spot size sufficiently small to process the processing surface to create the fine structure or pattern images or text.
